" Steps involved in QR code scanner "

\* we should have to log in with email in doc / google doc

\* Then we will find a + bottom at the bottom of the screen. —  
\* Then we have to create the document that what we needed

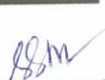

#### "Uses of Curry Leaves"

- Curry leaves are a rich source of vitamin A, vitamin B, vitamin C, vitamin B2, calcium, and iron, apart from a heavy distinctive odor and pungent taste. It helps in the treatment of dysentery, diarrhea, diabetes, morning sickness, and nausea by adding curry leaves to your meals. Often, curry leaves help flush out toxins and the fat content of the body.
- Curry

through the link.

\* Then create document link should be selected.

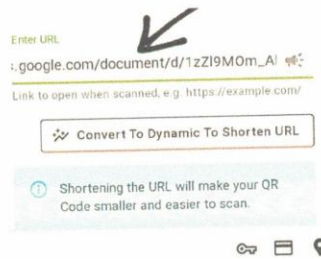

\* After all this we should enter the Google by typing the QR code generator

\* Then QR code generator will open then we should text a copy document text over there .

### Static QR Code

Content is directly encoded in the image. If you want to be able to update it later or use scan tracking, [create a Dynamic QR Code.](#)

### Static QR Code

Content is directly encoded in the image. If you want to be able to update it later or use scan tracking, [create a Dynamic QR Code.](#)

\* Then we find a QR code scanner . Then we should name to that folder.

\*Then we have to download it to our gallery.

Sam

Bismarck palm

**Classification:**

- Kingdom: Plantae
- Order: Arecales
- Family: Arecaceae
- Subfamily: Coryphoideae
- Tribe: Borasseae
- Genus: Bismarckia
- Species: *B. nobilis*
- Scientific name: *Bismarckia nobilis*

**History:**

The Bismarck Palm Tree, scientific name *Bismarckia nobilis*, is one of the most sought-after palms in Florida. The Bismarck Palm is native to the island of Madagascar near the east coast of Africa. All things considered, it is a newer palm to most Florida landscapes. This gorgeous palm is truly huge and stunning and will be sure to give that dramatic effect to any landscape. The *Bismarckia* is very wide, so it is great for shade or to provide privacy. This palm can handle chilly temperatures down to 15F and can be had in several states like Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, Nevada, Oregon, and Texas.

**Reproduction.**

*Bismarckia nobilis* grows from solitary trunks, gray to tan in color, which show ringed indentations from old leaf bases. Trunks are 30 to 45 cm in diameter, slightly bulging at the base, and free of leaf bases in all but its youngest parts. In their natural habitat they can reach above 25 meters in height but usually get no taller than 12 m in cultivation. The nearly rounded leaves are enormous in maturity, over 3 m wide, and are divided to a third its length into 20 or more stiff, once-folded segments, themselves split on the ends. The leaves are induplicate and costapalmate, producing a wedge-shaped hastula where the blade and petiole meet. Petioles are 2–3 m, slightly armed, and are covered in a white wax as well as cinnamon-colored caducous scales; the nearly-spherical leaf crown is 7.5 m wide and 6 m tall. Most cultivated *Bismarckias* feature silver-blue foliage although a green leaf variety exists (which is less hardy to cold). These palms are dioecious and produce pendent,

## "Tulsi"

### "Scientific Classification"

Kingdom: plantae  
Order: Lamiales  
Family: Lamiaceae  
Genus: Ocimum  
Species: O. tenuiflorum

### "Description"

- Tulsi is cultivated for religious and traditional medicine purposes, and also for its essential oil. It is widely used as a herbal tea, commonly used in Ayurveda, and has a place within the Vaishnava tradition of Hinduism, in which devotees perform worship involving holy basil plants or leaves.
- The variety of *Ocimum tenuiflorum* used in Thai cuisine is referred to as Thai holy basil (Thai: กะเพรา kaphrao) and is the key herb in phat kaphrao, a stir-fry dish; [3] it is not the same as Thai basil, which is a variety of *Ocimum basilicum*. In Cambodia, it is known as mreah-prov
- Holy basil is an erect, many-branched subshrub, 30–60 cm (12–24 in) tall with hairy stems. Leaves are green or purple; they are simple, petioled, with an ovate blade up to 5 cm (2 in) long, which usually has a slightly toothed margin; they are strongly
